
Py-By*converter*

Release 1.0.0

Aug 20, 2019

Contents:

1	INSTALLATION	1
1.1	TO DO!!	1
1.2	WIP!	1
2	PyBy Converter Usage	3
2.1	Command Line	3
3	Examples	5
4	Indices and tables	7

CHAPTER 1

INSTALLATION

1.1 TO DO!!

There are alot of little points to add here

1.2 WIP!

Package this!

PyBy Converter Usage

2.1 Command Line

The converter will read bytes from the command line and produce the byte conversions

```
./converter.py 22222222222222222222  
  
This is the result for 22222222222222222222 bytes  
MB 211927625.86805534  
GB 206960.5721367728  
TB 202.10993372731718
```

Multiple bytes can be listed at a time

```
./converter.py 333333 7777777  
  
This is the result for 333333 bytes  
MB 0.31789112091064453  
GB 0.0003104405477643013  
TB 3.031645974260755e-07  
This is the result for 7777777 bytes  
MB 7.417466163635254  
GB 0.007243619300425053  
TB 7.0738469730713405e-06
```

CHAPTER 3

Examples

We will add some examples here soon :)

CHAPTER 4

Indices and tables

- `genindex`
- `modindex`
- `search`
